DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to query processing and query translation input preparation, classified in class 707, subclass 3, 104.
- II. Claims 25-31, drawn to network resource browsing or navigating, classified in class 715, subclass 738, 748.

The inventions are distinct, each from the other because of the following reasons:

Inventions I drawn to query processing and query translation input claim (s) 1-24; and Invention II drawn to network resource browsing or navigating claim(s) 25-31, are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions .

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognize divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h)
